Dear sir/madam

**REF: COMPUTER SCIENCE ATTACHMENT**

Hello sir/madam. I am a 3<sup>rd</sup> year computer science student studying at St paul's university,limuru. The school requires that I spend three months,from January to March in a company that is related to my field of study prior to my final year. I am writing in response to your advertisement for the position of software engineering or any other field related to computer science including web development. I have experience in a number of programming languages which include PHP,Python,Java,C++ and JavaScript,front-end technologies which include HTML,CSS,XML,shell scripting and version control system GIT. Python and JavaScript are my favorite languages. I have also interacted with the Django framework and have experience in the REST API methodology. I also have experience in relational database systems ,MySQL,MSSQL,POSTGRESQL and NOSQL database system MONGODB

I shall be very grateful if my application is considered favorably.

Thanks a lot.

Yours faithfully

Chris Muiru
