Dear sir

**REF: Angular development work**

Hello sir. This letter is to express my interest in the the angular work you proposed on the software implementation class. As someone who is highly focused and attentive to detail,i thrive on building quality systems that surpass the end users expectations. This opportunity will enable me gain skills required on the job market shaping my career path. I enjoy being challenged and engaging with tasks that require me to work outside my comfort and knowledge set and this can be seen in the codewars account I shared earlier. I have experience in a number of programming languages which include Python,JavaScript,Java,C++ and Php,front-end technologies which include Html,Css,Xml,Sass,Tailwindcss and Webpack,Shell scripting,Version control system using Git,Android development using React Native,Restful api's using Django rest framework and Express framework,Object relational mappers(ORM) and UI development using React library. I understand both relational and non relational database methodology and have used Postgresql,Mssql,Mysql and Nosql database system MongoDB. Kindly analyze my projects and interactions with the coding community in the links that I shared

I shall be very grateful if my application is considered favorable.

Sincerely,

Chris Muiru
